

Project Tweety B.I.R.D. Bluebird House Monitoring Schedule Worksheet:

[illegible]

Full: Indicate if you are willing/able to complete monitoring for the FULL trail (both North Trail and South Trail) if necessary, in case of emergency, or if case circumstances dictate (our intention is to have each trail monitored separately – but I just want to be prepared).

Date: Dates are for Tuesdays, Wednesday, Thursdays. We are strongly encouraging to have monitoring take place on those days to keep better consistency in the number of days between PTB monitoring visits. Of course, exceptions will be allowed as circumstances dictate.

NOTE: We will assign a current/experienced PTB Bluebird Monitor to accompany NEW PTB Bluebird Monitors as long as they feel it is necessary. NEW PTB Monitors... just sign up for any of the dates... and we'll make sure you are not alone until you want to be.

For each date under your name, indicate your availability: 1 = Preferred, 2 = Possibly available.

For each date there will be a person assigned to monitor the North Trail, a person assigned to monitor the South Trail.

If assigned to PTB Monitoring Visit: no more than 7 days in advance (as weather/conditions can be more accurately forecasted) you will need to contact Robyn to determine a date and approximate time for monitoring visit (monitoring visits should take place between 8A and 4P).

Please try to keep to the Tuesday, Wednesday, Thursday schedule but if extenuating circumstances exist... other times may be considered (please discuss with Robyn).

If, for whatever reason, you are unable to complete the monitoring visit that you are scheduled for, communicate with all on the PTB e-mail list to find a replacement as soon as possible.

Be sure to display a PTB Parking Pass on your dashboard when parked on/near the property.

Monitoring groups should be no more than 4 persons (unless otherwise approved).
